for "Science 2.0"

..... :

CATER : Center for **AT**mospheric sciences & **E**arthquake **R**esearch

Tech. Development in Web 2.0 (symantic Web) era

Science 1.0 → Science 2.0

Gigabytes → Terabytes
Tarballs → Services
Journals → Wikis
Individuals → Communities
Community codes → Science gateways
Supercomputer centers → TeraGrid, OSG, campus
Makefile → Workflow
Computational science → Science as computation
Physical sciences → All sciences (& humanities)
Computational scientists → All scientists

Briefing and Discussion, Education

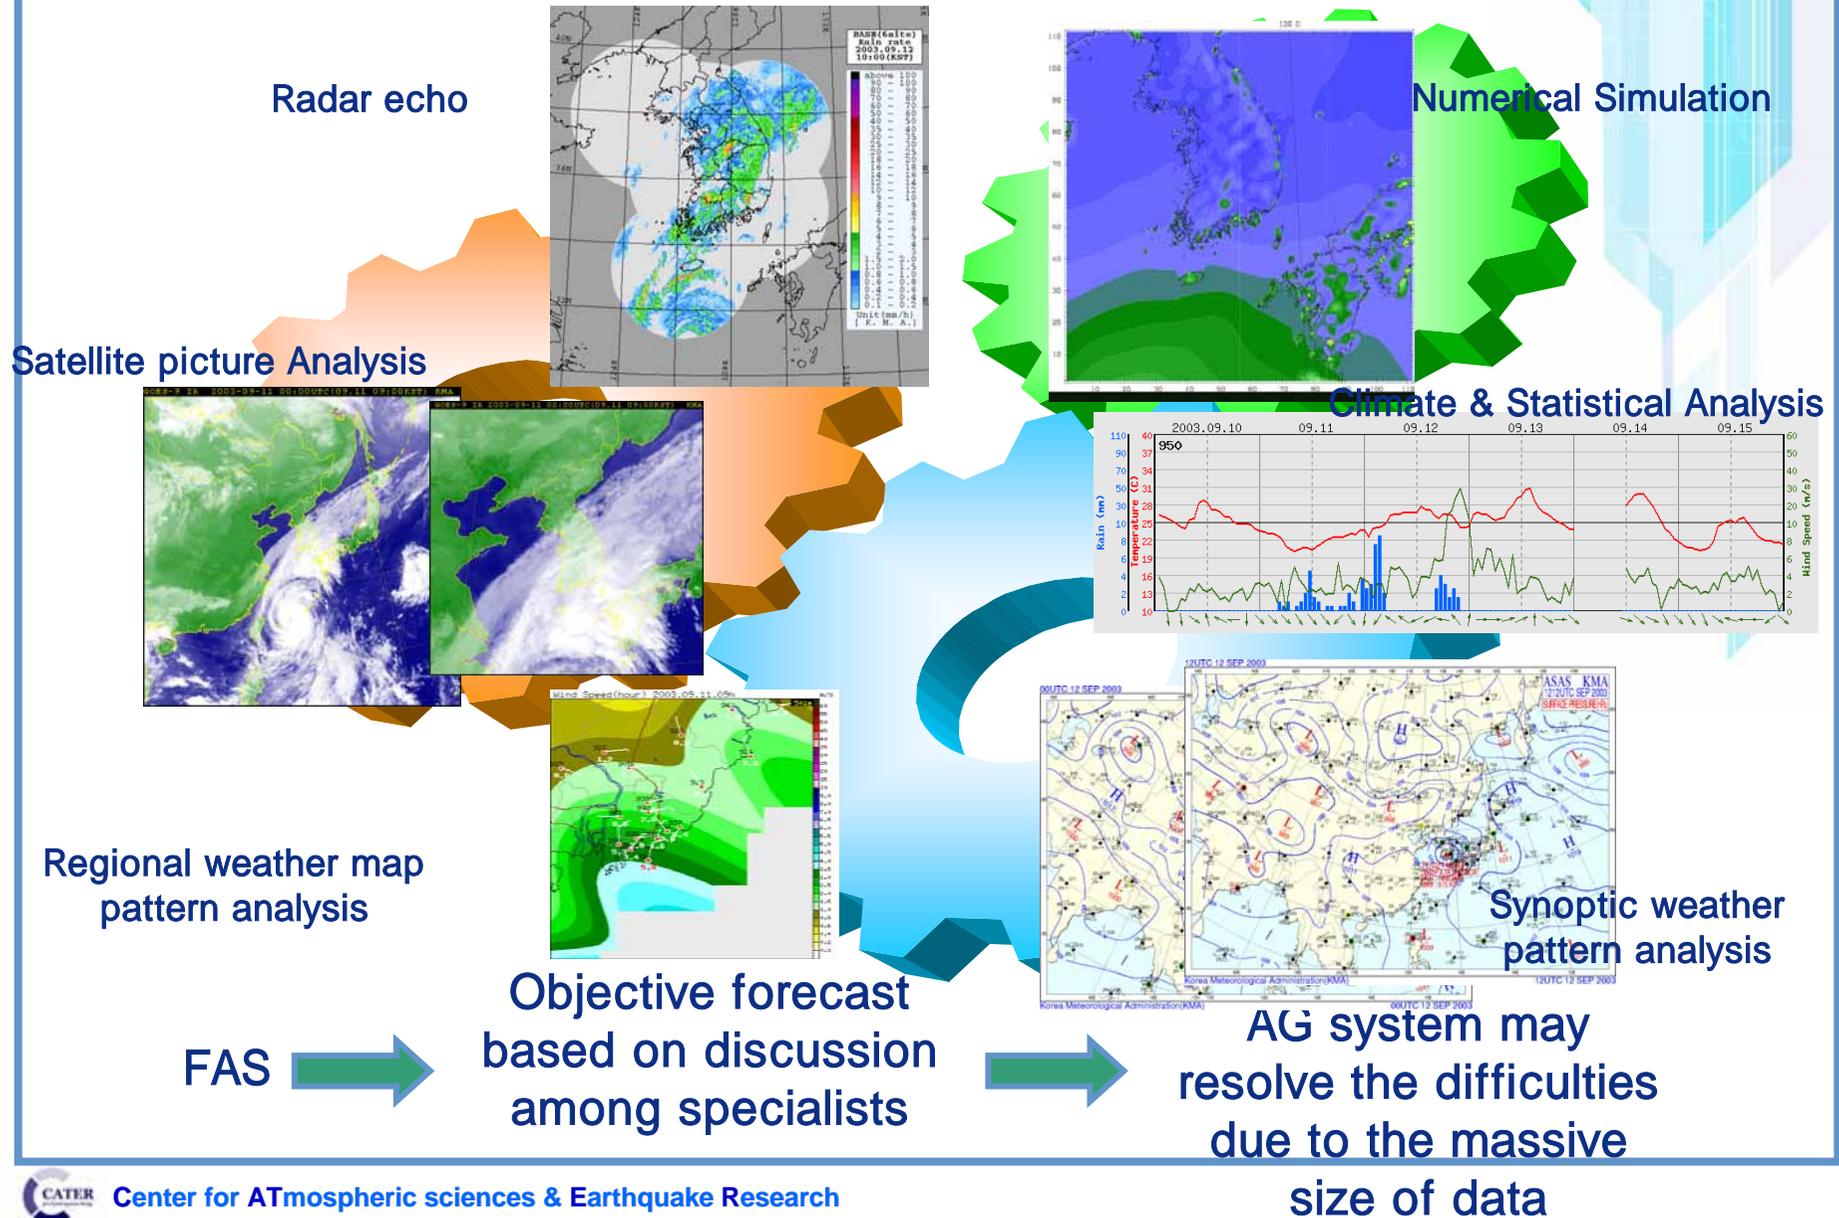

Phase of FAS Development

- **First phase (2000~2002): Development of weather interactive display and analysis system**
 - **Forecaster's Analysis System (FAS):** Two dimensional forecaster workstation with new forecast preparation concepts and interactive display based on the WFO-Advanced system developed to serve National Weather Service at FSL, which is the user interface of Advanced Weather Interactive Processing System (AWIPS)
- **Second phase (2003~2005): Development of automated nowcasting tools on FAS**
 - Development of new short-term forecasting tools and integrated into FAS
 - Ingesting preexisting finer grids numerical weather prediction model outputs
 - Development of KMA remote sensing data QC system to improve quality of input data of nowcasting system

2006. 11. 15. Implementation Plan of AG System at ANW

CATER's AG Application Plan

1. Enhancement of AG system among major univercities

- Technical Support to open “virtual Lab”
- Provide “Polycom”
- Encourage presentation with the use of AG system
- On-line evaluation of proposal & result by CATER

2. Open an ubiquitous lecture for FAS

- AG System, Web Operating System, FAS
- Committee for collaborative lecture among universities
- CATER Data Grid Portal

3. Set-up cyber-infrastructure for Earth system study

- IT Tech. to Atmospheric Sciences
- Science 2.0 environment for Atmospheric Sciences
- Set-up cyber-infra for Earth System Science

감사합니다!
